## PROFESSIONAL SUMMARY

Full-stack MERN developer with 1.5+ years of experience at TCS specializing in LLM integration, RAG pipeline development, and AI-powered applications. Experienced in architecting real-world RAG and LLM-powered applications using LangChain.js and vector databases (Pinecone, ChromaDB). Strong foundation in React, Node.js, Express.js, MongoDB, and TypeScript. Seeking Full-Stack / AI Engineer roles where I can apply LLM and RAG expertise to build scalable, production-ready applications..

## TECHNICAL SKILLS

**Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Redux

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication

**AI / LLM:** LangChain.js, RAG Pipelines, Prompt Engineering, LangSmith.

**Databases:** MongoDB, Pinecone, ChromaDB, SQL

**Tools:** Git, GitHub, Postman, Figma

**Languages:** Python, Java

## EXPERIENCE

### Programmer — Tata Consultancy Services (TCS)

Nov 2025 – Present

- Integrated multiple LLMs into enterprise applications and built end-to-end RAG pipelines using the MERN stack and LangChain.js, cutting average manual query resolution time by ~40%.
- Designed prompt orchestration and multi-LLM workflows across 3+ AI-driven modules, improving response accuracy and consistency by an estimated 25-30%.
- Managed token optimization, context window handling, and API rate limiting, ensuring consistent performance and reliability across production LLM deployments.
- Handled asset tracking and SLA-driven issue resolution in an Asset Management, coordinating across internal teams to consistently meet SLA targets.

### Graduate Trainee — Tata Consultancy Services (TCS)

Nov 2024 – Oct 2025

- Completed a structured 6-month MERN stack training program, building full-stack web applications with RESTful APIs and MongoDB.
- Delivered 5+ frontend-backend integrated applications, contributing to real-world use cases that strengthened problem-solving and system architecture skills.

## PROJECTS

### Poly Mind – Multi-LLM Comparison Platform | LangChain.js, React, Node.js | ([GitHub](#)) ([Demo](#))

- Built a real-time platform comparing responses from 6 AI providers (OpenAI, Anthropic, Meta LLAMA, Google, AWS Bedrock, Hugging Face) side-by-side for the same prompt.
- Applied token management, context handling, and stateless LLM architecture, reducing average response latency by ~10% across providers.

### RAG System – Context-Aware Q&A over Custom Documents | LangChain.js, Pinecone | ([GitHub](#)) ([Live](#))

- Built an end-to-end RAG pipeline covering document ingestion, chunking, embedding (nomic-embed-text via Ollama), cosine similarity vector search, and LLM response generation.
- Tuned chunk size, overlap, and top-K retrieval strategy, reducing hallucinations and improving answer grounding accuracy by ~80% on domain-specific documents.

### E-Commerce Web Application | React, Node.js, Express.js, MongoDB | ([GitHub](#))

- Developed a full-stack e-commerce app with secure JWT authentication, product catalog, cart functionality, and an admin panel for CRUD operations.

## EDUCATION

### B.Sc. Computer Science — The American College, Madurai

2021 – 2024

GPA: 7.8 / 10

## CERTIFICATIONS

- Generative AI for Node.js: LangChain & RAG — Udemy ([Link](#))
- Complete Full-Stack Web Development Bootcamp — Udemy ([Link](#))
- CRUD operations in MongoDB — ICT Academy ([Link](#))
- HTML/CSS/JavaScript — Johns Hopkins University, Coursera ([Link](#))
